Invenergy Secures 800 MW of Wind Turbines for 2009 Projects in North America and Europe

Contracts with GE for 2007, 2008 and 2009 total 2,100 MW

CHICAGO – November 16, 2007 -- Invenergy Wind LLC announced that it has contracted with General Electric Company (“GE”) to purchase an additional 800 MW of wind turbines for use in projects slated for construction in 2009 in North America and Europe. Along with Invenergy’s previous purchases of 600 MW for 2007 and 700 MW for 2008 from GE, this provides 2,100 MW of wind turbines for Invenergy’s 2007, 2008 and 2009 build programs. These turbines are slated for Invenergy’s projects in the US, Canada and Europe.

Invenergy Wind currently has 13 facilities representing more than 1,200 megawatts of wind energy projects in operation and construction in the US and Europe. Wind energy projects completed and under construction by Invenergy Wind are expected to generate more than 3.6 billion kilowatt hours of electricity per year with clean and renewable generation technology, enough to power almost 400,000 homes. With its portfolio of operating and construction projects, Invenergy is one of the largest privately owned wind energy generation companies in the world.

About Invenergy Wind LLC

Invenergy Wind LLC is a subsidiary of Invenergy LLC, a developer, owner and operator of utility-scale electricity generating facilities including wind energy and natural gas-fired projects. The company has comprehensive expertise in the development, financing, construction, operation and management of power generation projects serving a wide range of utilities, load serving entities and industrials. The members of Invenergy’s senior management team have extensive experience in diverse areas of the energy market and a track record of resounding success.

Invenergy is headquartered in Chicago and has North American offices in Denver, Washington D.C., Toronto, Milwaukee, Tampa, San Francisco, Portland, and Austin, Texas. Overseas offices are located in London, Warsaw, Budapest and Athens.
