

**Legend**

● Proposed Turbine Location	● Participating Residence	■ Junction Box	<b>Turbine Setback</b>	□ On-Site Parcel (Owner is Participating or in Discussion)	— Primary Road
▲ Permanent Met Tower	● Off-Site Residence	— Dominion Gas Pipeline	○ 1,320 ft	□ Off-Site Parcel	— Secondary Road
● Residential Water Well Locations	■ Public Buildings and Churches	— Transmission line	○ 700 ft	□ Township Boundary	— Local Road
		— Collection System	○ 1.2 Tip Height (512 ft)	■ Substation	— Cable and access road (where only require adjustments of 50 to 100 feet to minimize environmental impact or accommodate land owner request)
		— Access Roads	○ 500 ft	■ O&M Building	
				■ Laydown Area	
				■ Fencing	

# Stony Creek Plot Plan

The Stony Creek Wind Farm, Wyoming County, New York

**Note:**  
 This plot plan shows the maximum potential number of wind turbines, including turbines for which Stony Creek Energy is in the process of negotiating lease and/or setback agreements. Depending on final negotiations with landowners, Stony Creek Energy may need to remove certain turbines or shift their locations. The maximum number of turbines are included in the application because SEORA requires showing the maximum expected impact of the proposed project.
